

## **Hardcopy Topographic Map Rationalisation – September 2018**

DFSI Spatial Services has reviewed its Topographic Map program and will be reducing the number of topographic maps printed.

Currently the Topographic Map catalogue contains 1,094 separate titles across various scales, all of which will continue to be made available in digital (printable PDF) form. Of these, 570 will continue to be printed. Lists outlining which titles will continue to be printed, and those that will be available only as a printable PDF are available on both the Spatial Services website <http://spatialservices.finance.nsw.gov.au/> and SIX Portal <https://six.nsw.gov.au/>.

All titles will remain in stock until Monday 3 September 2018, unless sold before that date. From Monday 3 September 2018 only those 570 titles identified as to be continued will be provided as printed maps.

DFSI Spatial Services provides both printed and digital topographic map products under a Creative Commons CC-BY 4.0 license. We will continue to produce digital (PDF) editions of all topographic map titles, which are available on the Spatial Portal's map store (via <https://six.nsw.gov.au/>). Under CC-BY licensing, you are able to print and reproduce titles as you see fit.

If you would like to acquire stock of the outgoing titles, please place orders prior to Monday 3 September 2018. Following this date the titles will be retired as a hard copy product.

If you require any further information, please feel free to contact:
