

NSW Cadastre Web Services

Information Sheet

December 2022

Web service description

- NSW Cadastre web service is a dynamic map of cadastral features extracted from the NSW Digital Cadastral Database (DCDB).
- It provides access to a state wide integrated database and a component of the foundation spatial datasets within New South Wales. A 'cadastre' is an official register of property showing boundaries. The DCDB contains current land titles only.
- The cadastral feature class layers provided through this web service includes: for a wide range of residential, commercial and government complex sites within NSW.
 - Large Rural Plan Extent
 - Rural Plan Extent
 - Section Extent
 - Plan Extent
 - Lot
 - Plan Extent Labels
 - Section Extent Labels
 - Lot Labels

The available attributes for point queries are:

- Lot/Section/Plan string
- CadID

Web service uses/fitness for purpose

This web service allows users to easily integrate NSW Cadastre into Open Geospatial Consortium (OGC) compliant spatial platforms and applications.

The NSW Cadastral web service can be used for resource management, environmental management, land use planning, agriculture management, emergency management and recreational purposes.

This service can be used to aggregate information for analytical purposes. Cadastral boundary data in combination with geo-coded address data, imagery, demographic information and agency specific business information underpins the ability to perform high quality spatial analysis.

Current State

This web service is current and complete.

Update frequency

As required.

Future development

This web service is updated when new information is captured or sourced by Spatial Services.

Standards and specifications

Open Geospatial Consortium (OGC) implemented and compatible for consumption by common GIS platforms. Available as either cache or non-cache, depending on client use or requirement.
