Class Descriptions

AccountLineLink

Description: Defines the relationship between a Crown land account part and a spatial line feature.

Attribute Name	Data Type	Allow Nulls	Constraints
CrownLandLineOID	Integer (0)	F	
AccountPartOID	Integer (0)	F	
CreateDate	Date/Time	T	

AccountPart

Description: A component of a Crown land account defined by a lot, lot part or described piece of unidentified land. Account parts are defined upon the creation of the account and added or subtracted as the account changes over time.

Attribute Name	Data Type	Allow Nulls	Constraints
AccountOID	Integer (0)	T	
CrownKeyType	Char	T	
CrownKeyID	Char	T	
DefinitionType	Char	T	
LotRelationship	Char	T	
LotNumber	Char	T	
SectionNumber	Char	T	
PlanType	Char	T	
PlanNo	Char	T	
Description	Char (2000)	T	
Area_M2	Double (20,5)	T	
AreaUnits	Char	T	
AreaSource	Char	T	
AuthorityReferenceOID	Integer (0)	T	
CommenceDate	Date/Time	T	
TerminateDate	Date/Time	T	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

AccountPointLink

Description: Defines the relationship between a Crown land account part and a spatial point feature.

Attribute Name	Data Type	Allow Nulls	Constraints
CrownLandPointOID	Integer (0)	F	
AccountPartOID	Integer (0)	F	
CreateDate	Date/Time	T	

AccountPolygonLink

Description: Defines the relationship between a Crown land account part and a spatial polygon feature.

Attribute Name	Data Type	Allow Nulls	Constraints
CrownLandPolygonOID	Integer (0)	F	
AccountPartOID	Integer (0)	F	
CreateDate	Date/Time	T	

AccountStructure

Description: Defines the relationship between a physical structure and a Crown account.

Attribute Name	Data Type	Allow Nulls	Constraints
CrownLinkID	Char	T	
StructureOID	Integer (0)	F	
AccountOID	Integer (0)	F	
CommenceDate	Date/Time	T	
TerminateDate	Date/Time	T	
CreateDate	Date/Time	T	

AboriginalLandClaim

Description: The spatial extent of Aboriginal Land Claims processed or investigated by the Department of Lands. This class does not hold all land claims but only those which cover Crown (or some categories of state-owned land) and/or are recorded for investigation by the department.

GeometryType:esriGeometryPolygon		**HasM:**False	**HasZ:**False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
ClaimID	Integer (0)	F	
ClaimantName	Char (255)	T	
Subtypedate	Date	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	
ClassSubtype	Integer (0)	F	Subtype values for this class

AdministrativeAreas

Description: A class that includes all administrative geometries. Included to expedite spatial queries.

GeometryType:esriGeometryPolygon		**HasM:**False	**HasZ:**False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
AreaName	Char	F	
AreaType	Char	F	DmC_AdministrativeArea
AreaCADID	Integer (0)	F	
ClassSubtype	Integer (0)	F	Subtype values for this class

AuthorityReference

Description: A polygon feature class that depicts the changes to an area definition that has occurred through a gazettal, act or government file action.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
ReferenceName	Char	F	
ReferenceFolio	Char	T	
ReferenceDate	Date/Time	F	
CrownGazettalID	Char	T	
AuthorityActionType	SmallInteger (0)	T	
AuthorityReferenceType	SmallInteger (0)	F	
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

CadLine

Description: The line segments that all polygon features in the Cadastral Geodatabase are derived from.

GeometryType:esriGeometryPolyline		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
CadLineType	SmallInteger (0)	F	
IsCurrent	SmallInteger (0)	F	DmC_Boolean
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

CadPoint

Description: A point that falls at the end of a Cadastral Line (CadLine).

GeometryType:esriGeometryPoint		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
IsControlled	SmallInteger (0)	F	DmC_Boolean
IsCurrent	SmallInteger (0)	F	DmC_Boolean
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

ControllingAuthority

Description: A table that holds a generic listing of authorities responsible for a parcel of land.

Attribute Name	Data Type	Allow Nulls	Constraints
AuthorityId	Short	F	
AuthorityName	String (60)	F	
GprAuthorityId	Short	T	
ParentAuthorityId	Short	T	
AuthorityType	String (30)	T	
AuthorityGroup	String (30)	T	
AuthoritySource	String (30)	F	

Coordinate

Description: A spatial position on the earth's surface expressed in Decimal Degrees – Datum GDA94 and GDA2020.

Attribute Name	Data Type	Allow Nulls	Constraints
CadPointOID	Integer (0)	T	
CadPointCADID	Integer (0)	T	
Longitude	Double (13,10)	T	
Latitude	Double (13,10)	T	
Height	Double (8,3)	T	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	

County

Description: One of 141 basic divisions of the State of New South Wales, further divided into parishes, for administrative purposes, especially for management and disposal of Crown lands.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
CountyName	Char	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

CountyAuthorityRef

Description: : An AuthorityReference relating to the boundary redefinition of a County.

Attribute Name	Data Type	Allow Nulls	Constraints
CountyOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

CrownAccount

Description: An account, issued and managed by DLWC, over or relating to Crown land.

Attribute Name	Data Type	Allow Nulls	Constraints
CrownLregNo	Char	T	
CrownAccountID	Integer (0)	T	
ClassSubType	Integer (2)	F	Subtype values for this class
CrownAccountType	SmallInteger (0)	T	
StartAuthorityReferenceOID	Integer (0)	T	
EndAuthorityReferenceOID	Integer (0)	T	
CommenceDate	Date/Time	T	
TerminateDate	Date/Time	T	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

CrownLandLine

Description: A spatial feature representing a subdivision of land for which the Crown (under the meaning of the Crown Lands and other related Acts), has an interest as a controlling or management authority.

GeometryType:esriGeometryPolyline		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
CrownLandStatusType	SmallInteger (0)	F	DmC_CrownLandStatus
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
DisposalStatus	SmallInteger (0)	F	DmC_CrownDisposalStatus
ModifiedDate	Date/Time	T	

CrownLandPoint

Description: A spatial feature representing a subdivision of land for which the Crown (under the meaning of the Crown Lands and other related Acts), has an interest as a controlling or management authority.

GeometryType:esriGeometryPoint		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
CrownLandStatusType	SmallInteger (0)	F	DmC_CrownLandStatus
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	
DisposalStatus	SmallInteger (0)	F	DmC_CrownDisposalStatus

CrownLandPolygon

Description: A spatial feature representing land for which the Crown (under the meaning of the Crown Lands and other related Acts), has an interest as a controlling or management authority.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
CrownLandStatusType	SmallInteger (0)	F	DmC_CrownLandStatus
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	
DisposalStatus	SmallInteger (0)	F	DmC_CrownDisposalStatus

CrownStructure

Description: Describes a physical object that is attached to or exists on, the land described by a Crown land account.

Attribute Name	Data Type	Allow Nulls	Constraints
CrownKeyType	Char	F	
CrownKeyID	Char	F	
Structure	Char	T	
StructureType	SmallInteger (0)	F	DmC_CrownStructureLicenceType
Dimensions	Char	T	
NoStructures	Integer (0)	T	
Notes	Char	T	
Area_M2	Double (20,5)	T	
AreaUnits	Char	T	
AreaSource	Char	T	
CommenceDate	Date/Time	T	
TerminateDate	Date/Time	T	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

CrownStructureLine

Description: A spatial feature representing an existing or authorised structure over Crown land or land for which the Crown has a management interest in.

GeometryType:esriGeometryPolyline		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
CrownStructureType	SmallInteger (0)	F	DmC_CrownStructureLicenceType
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

CrownStructurePoint

Description: A spatial feature representing an existing or authorised structure over Crown land or land for which the Crown has a management interest in.

GeometryType:esriGeometryPoint		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
CrownStructureType	SmallInteger (0)	F	DmC_CrownStructureLicenceType
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

CrownStructurePolygon

Description: A spatial feature representing an existing or authorised structure over Crown land or land for which the Crown has a management interest in.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
CrownStructureType	SmallInteger (0)	F	DmC_CrownStructureLicenceType
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

DomesticWaterFrontPrecinct

Description: This class records the spatial extent of Domestic Water Front (DWF) Precincts created in line with IPART Domestic Waterfront Reforms. Precinct boundaries will overlap all waterfront lots that are currently licensed or could be licensed in the future. It will also cover existing tenures that exist adjacent to waterfront reserves until such time that the licence is terminated. DWF precincts will overlap roads and unidentified land if these features are adjoining a water feature and are contained within the precinct.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
PrecinctName	Char (40)	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

Easement

Description: A right, attached to land (the dominant tenement), to use other land (the servient tenement) for a specified non-exclusive purpose known to the law, e.g. right of carriageway, easement to drain water - however the law recognises an easement in favour of a statutory authority without a dominant tenement, described as an "easement in gross".

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
PlanOID	Integer (0)	T	
EasementType	SmallInteger (0)	F	
ControllingAuthorityOID	Integer (0)	F	
EasementWidth	Char	T	
StratumLevel	SmallInteger (0)	F	DmC_StratumLevel
ClassSubtype	Integer (0)	T	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

EasementAuthorityRef

Description: An AuthorityReference relating to easements.

Attribute Name	Data Type	Allow Nulls	Constraints
EasementOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

Epoch

Description: A fixed point in time that is the basis for all computations.

Attribute Name	Data Type	Allow Nulls	Constraints
ClassSubtype	Integer (0)	T	Subtype values for this class
EpochType	SmallInteger (0)	F	
PlanOID	Integer (0)	T	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	

EpochCoordinate

Description: The intersection table for Epoch and Cooordinate.

Attribute Name	Data Type	Allow Nulls	Constraints
EpochOID	Integer (0)	F	
CoordinateOID	Integer (0)	F	

FEDAuthorityRef

Description: An AuthorityReference relating to the boundary redefinition of an Federal Electoral Division.

Attribute Name	Data Type	Allow Nulls	Constraints
FEDOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

FederalElectoralDivision

Description: A gazetted area of a federal electoral division that has been defined by redistribution.

GeometryType: esriGeometryPolygon **HasM:** False **HasZ:** False

Attribute Name	Data Type	Allow Nulls	Constraints
DivisionName	Char	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

LandDistrict

Description: An administrative boundary used for the purposes of land administration. District Lands Office and Regional boundaries are based on an aggregation of Land Districts.

GeometryType: esriGeometryPolygon **HasM:** False **HasZ:** False

Attribute Name	Data Type	Allow Nulls	Constraints
DistrictName	Char	F	
LandsOfficeOID	Integer (0)	T	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

LandDistrictAuthorityRef

Description: An AuthorityReference relating to the boundary redefinition of a Land District.

Attribute Name	Data Type	Allow Nulls	Constraints
LandDistrictOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

LandsOffice

Description: A boundary used for the administration of Crown land being an aggregation of land district boundaries.

GeometryType: esriGeometryPolygon **HasM:** False **HasZ:** False

Attribute Name	Data Type	Allow Nulls	Constraints
OfficeName	Char	F	
OfficeCode	Integer (0)	T	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

LGAAuthorityRef

Description: An AuthorityReference relating to the boundary redefinition of a Local Government Area.

Attribute Name	Data Type	Allow Nulls	Constraints
LGAOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

LivestockHealthPestAuthorityDistrict

Description: Replacement for Rural Lands Protection Districts.

GeometryType:esriGeometryPolygon   **HasM:**False   **HasZ:**False

Attribute Name	Data Type	Allow Nulls	Constraints
DistrictName	Char	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

LocalAboriginalLandCouncil

Description: A gazetted area with input by the Aboriginal and Torres Strait Islander Commission of Local Aboriginal Land Councils.

GeometryType:esriGeometryPolygon   **HasM:**False   **HasZ:**False

Attribute Name	Data Type	Allow Nulls	Constraints
LocalCouncilName	Char	F	
RegionalCouncilName	Char	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

LocalAboriginalLandCouncilAuthorityRef

Description: An AuthorityReference relating to the boundary redefinition of an Aboriginal Land Council.

Attribute Name	Data Type	Allow Nulls	Constraints
LALCOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

LocalGovernmentArea

Description: A gazetted boundary defining the Local Government Area.

GeometryType:esriGeometryPolygon   **HasM:**False   **HasZ:**False

Attribute Name	Data Type	Allow Nulls	Constraints
LGAName	Char	T	
CouncilName	Char	F	
ABSCode	Integer (0)	F	
LTOCode	Integer (0)	T	
VGCode	Integer (0)	T	
WBCode	Integer (0)	T	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

Lot

Description: A parcel of land created by a registered Deposited Plan or title e.g Lot 10 DP12345.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False

Attribute Name	Data Type	Allow Nulls	Constraints
LotNumber	Char	T	
SectionNumber	Char	T	
PlanLotArea	Double (20,5)	T	
PlanLotAreaUnits	Char	T	
ControllingAuthorityOID	Integer (0)	F	
PlanOID	Integer (0)	T	
PlanNumber	Integer (0)	T	
PlanLabel	Char	T	
ITSTitleStatus	SmallInteger (0)	F	DmC_ITSTitleStatus
ITSLotID	Integer (0)	T	
StratumLevel	SmallInteger (0)	F	DmC_StratumLevel
HasStratum	SmallInteger (0)	T	DmC_Boolean
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

LotAuthorityRef

Description: An AuthorityReference relating to Lots of Deposited Plans.

Attribute Name	Data Type	Allow Nulls	Constraints
LotOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

LotPlan

Description: The intersection table for Crown parcels that Lot/DP is not the plan of survey e.g. Crown Portions with Parish DP.

Attribute Name	Data Type	Allow Nulls	Constraints
PlanOID	Integer (0)	F	
LotOID	Integer (0)	F	
ReferenceType	SmallInteger (0)	F	DmC_LotPlanReferenceType
CreateDate	Date/Time	F	

MinesSubsidenceDistrict

Description: Mine Subsidence Districts define the area of control of the Mine Subsidence Board, which administers the *Mine Subsidence Compensation Act, 1961*.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
DistrictName	Char	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

MiscellaneousReserves

Description: Reserves within NSW that have been established under separate legislation.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
ReserveName	Char	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

MiscReservesAuthorityRef

Description: An AuthorityReference relating to the boundary redefinition of a Misc Reserve.

Attribute Name	Data Type	Allow Nulls	Constraints
MiscReserveOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

MSDAuthorityRef

Description: An AuthorityReference relating to the boundary redefinition of a Mines Subsidence District.

Attribute Name	Data Type	Allow Nulls	Constraints
MSDOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

NamedCadRoadNameSource

Description: The name of the source of the road name.

Attribute Name	Data Type	Allow Nulls	Constraints
RoadNameOID	Integer (9)	F	
AuthorityRoadNameOID	Integer (9)	F	
SourceDate	Date/Time (9)	F	

NPWSReserve

Description: Under the terms of the *National Parks and Wildlife Act, 1974*, certain areas of NSW that have been reserved.

GeometryType:esriGeometryPolygon   **HasM:**False   **HasZ:**False

Attribute Name	Data Type	Allow Nulls	Constraints
ReserveName	Char	F	
ReserveCode	Integer (0)	F	
ReserveType	Char	F	DmC_NPWSReserveType
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

NPWSReserveAuthorityRef

Description: An AuthorityReference relating to the boundary redefinition of an NPWS.

Attribute Name	Data Type	Allow Nulls	Constraints
NPOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

Parish

Description: One of 7459 areas formed by the division of 141 counties (which see). Counties and parishes are administrative divisions of the state and are not separately disposable land parcels. Parishes are divided into separately disposable parcels called "portions", these being the common basic units of land disposed of by the Crown. Other basic units are allotments in Government Towns and Villages.

GeometryType:esriGeometryPolygon   **HasM:**False   **HasZ:**False

Attribute Name	Data Type	Allow Nulls	Constraints
ParishName	Char	F	
ParishDPNo	Integer (0)	F	
CountyOID	Integer (0)	T	
CountyName	Char	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

ParishAuthorityRef

Description: An AuthorityReference relating to the boundary redefinition of a Parish.

Attribute Name	Data Type	Allow Nulls	Constraints
ParishOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

Plan

Description: A polygon that depicts the spatial extent of a plan registered at NSW Land Registry Services.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
PlanNumber	Integer (0)	F	
PlanNumberSuffix	Char	T	
RegisteredPlanID	Integer (0)	T	
Orientation	SmallInteger (0)	T	DmC_PlanOrientation
SurveyDate	Date/Time	T	
RegistrationDate	Date/Time	T	
DistanceType	SmallInteger (0)	F	DmC_PlanDistanceType
PlanExtentStatus	SmallInteger (0)	F	DmC_PlanStatus
SmallNumber	Integer (0)	T	
SmallNumberSuffix	Char	T	
CombinedScaleFactor	Double (7,6)	T	
IsCurrent	SmallInteger (0)	F	DmC_Boolean
PlanPurpose	SmallInteger (0)	F	
HasStratum	SmallInteger (0)	F	DmC_Boolean
IsSurveyed	SmallInteger (0)	F	DmC_Boolean
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

PlanExtent

Description: The current extent/perimeter of a plan, excluding roads.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
PlanOID	Integer (0)	T	
PlanAnnotation	Char	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

PlanLine

Description: The line defined in a plan of survey.

Attribute Name	Data Type	Allow Nulls	Constraints
PlanOID	Integer (0)	T	
CadLineOID	Integer (0)	T	
SurveyLineOID	Integer (0)	T	
Bearing	Double (9,4)	T	DmC_PlanDistanceType
Distance	Double (9,3)	T	
Radius	Double (9,3)	T	
CentralAngle	Double (8,5)	T	
ArcDistance	Double (9,3)	T	DmC_Boolean
ChordDistance	Double (9,3)	T	
ArcDirection	Char	T	
ReverseOrientation	SmallInteger (0)	F	DmC_Boolean
ConstructTraverseNumber	Integer (0)	T	
ConstructLineNumber	Integer (0)	T	
ConstructLineType	Char	F	ConstructLineTypes
Offset	Double (9,3)	T	
FromCadPointOID	Integer (0)	F	
ToCadPointOID	Integer (0)	F	
PlanLineType	SmallInteger (0)	F	DmC_PlanLineType
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

RailwayCorridor

Description: The extent of a polygon which represents a railway corridor.

GeometryType:esriGeometryPolygon   **HasM:**False   **HasZ:**False

Attribute Name	Data Type	Allow Nulls	Constraints
RailwayNameOID	Integer (0)	T	
RailwayNameLabel	Char	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

RailwayGazettal

Description: A gazette relating to Railways.

Attribute Name	Data Type	Allow Nulls	Constraints
RailwayOID	Integer (9)	F	
GazettalOID	Integer (9)	F	
CreateDate	Date/Time	F	

RLPDAuthorityRef

Description: An AuthorityReference relating to the boundary redefinition of a Rural Land Protection District.

Attribute Name	Data Type	Allow Nulls	Constraints
RLPDOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

Road

Description: An open way for the passage of vehicles, persons or animals on land.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
RoadType	SmallInteger (0)	T	
RoadWidth	Char	T	
RoadWidthUnits	Char	T	
CouncilWidth	Char	T	
CouncilWidthUnits	Char	T	
LotNumber	Char	T	
ControllingAuthorityOID	Integer (0)	F	
PlanOID	Integer (0)	T	
PlanNumber	Integer (0)	T	
PlanLabel	Char (40)	T	
ITSTitleStatus	SmallInteger (0)	F	DmC_ITSTitleStatus
ITSLotID	Integer (0)	T	
StratumLevel	SmallInteger (0)	F	DmC_StratumLevel
HasStratum	SmallInteger (0)	T	DmC_Boolean
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	
SectionNumber	Char (3)		

RoadAuthorityRef

Description: An AuthorityReference relating to Roads.

Attribute Name	Data Type	Allow Nulls	Constraints
RoadOID	Integer (9)	F	
AuthorityReferenceOID	Integer (9)	F	
CreateDate	Date/Time	F	

RoadCentreline

Description: A line that forms the centreline of the feature class Road.

GeometryType:esriGeometryPolyline		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
RoadNameOID	Integer (0)	T	
RoadNameLabel	Char	T	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

RoadCorridor

Description: The extent of a polygon which represents a road in use.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
RoadNameOID	Integer (0)	T	
RoadType	SmallInteger (0)	T	DmC_RoadType
RoadCorridorType	SmallInteger (0)	T	
RoadNameLabel	Char	T	
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

RoadNameSuffix

Description: A class defining the SUFFIX component of a road name as defined by AS4212-1994 Street Addressing Standard. eg. 'West' in Prince Street West.

Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
NameSuffix	Char	T	
NameSuffixCode	Char	T	
CreateDate	Date/Time	F	

RoadNameType

Description: A class defining the TYPE component of a road name, as defined by AS4212-1994 Street Addressing Standard. eg. 'Street' in Prince Street West.

Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
NameType	Char	T	
NameTypeCode	Char	T	
CreateDate	Date/Time	F	

RuralLandProtectionDistrict

Description: Rural Lands Protection Districts are administrative districts as constituted under the Rural Lands Protection Act 1998 for the protection of rural lands.

GeometryType:esriGeometryPolygon | | **HasM:**False | **HasZ:**False

Attribute Name	Data Type	Allow Nulls	Constraints
DistrictName	Char	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

ScimsInterface

Description: The link between the feature class subtype Survey Control of CadPoint and a mark from the Survey Control Information Management System (SCIMS).

Attribute Name	Data Type	Allow Nulls	Constraints
CadPointOID	Integer (0)	T	
SurveyMarkOID	Integer (0)	T	
MarkType	Char	F	
MarkNumber	Integer (0)	F	
ReferenceDate	Date/Time	T	
GDAClass	Char	F	
AHDClass	Char	T	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	

SectionExtent

Description: The current section extent/perimeter of a plan, excluding roads.

GeometryType:esriGeometryPolygon | | **HasM:**False | **HasZ:**False

Attribute Name	Data Type	Allow Nulls	Constraints
PlanOID	Integer (0)	T	
SectionAnnotation	Char	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

SEDAuthorityRef

Description: An AuthorityReference relating to the boundary redefinition of an State Electoral Boundary.

Attribute Name	Data Type	Allow Nulls	Constraints
SEDOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

StateElectoralDistrict

Description: A gazetted area of a state electoral district that has been defined by redistribution.

GeometryType:esriGeometryPolygon		**HasM:**False	**HasZ:**False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
DistrictName	Char	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

StateForest

Description: A gazetted area reserved for forestry purposes.

GeometryType:esriGeometryPolygon		**HasM:**False	**HasZ:**False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
StateForestName	Char	F	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

StateForestAuthorityRef

Description: An AuthorityReference relating to the boundary redefinition of an State Forest.

Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
StateForestOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

StructureLineLink

Description: Defines the relationship between a Crown Structure and a spatial line feature.

Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
StructureLineOID	Integer (0)	F	
CrownStructureOID	Integer (0)	F	
CreateDate	Date/Time	T	

StructurePointLink

Description: Defines the relationship between a Crown Structure and a spatial point feature.

Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
StructurePointOID	Integer (0)	F	
CrownStructureOID	Integer (0)	F	
CreateDate	Date/Time	T	

StructurePolygonLink

Description: Defines the relationship between a Crown Structure and a spatial polygon feature.

Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
StructurePolygonOID	Integer (0)	F	
CrownStructureOID	Integer (0)	F	
CreateDate	Date/Time	T	

Suburb

Description: A gazetted boundary of a suburb or locality area.

GeometryType: esriGeometryPolygon   **HasM:** False   **HasZ:** False

Attribute Name	Data Type	Allow Nulls	Constraints
SuburbName	Char	F	
PostCode	Integer (0)	T	
State	SmallInteger (0)	T	DmC_State
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

SuburbAuthorityRef

Description: An AuthorityReference relating to the boundary redefinition of a suburb or locality.

Attribute Name	Data Type	Allow Nulls	Constraints
SuburbOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

SurveyLine

Description: The line segments that link between Survey control and Cadlines in the Cadastral Geodatabase.

GeometryType: esriGeometryPolyline   **HasM:** False   **HasZ:** False

Attribute Name	Data Type	Allow Nulls	Constraints
SurveyLineType	SmallInteger (0)	F	DmC_SurveyLineType
IsCurrent	SmallInteger (0)	F	DmC_Boolean
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

SurveyMarkPlan

Description: The intersection table for ScimsInterface and Plan.

Attribute Name	Data Type	Allow Nulls	Constraints
ScimsInterfaceOID	Integer (0)	F	
PlanOID	Integer (0)	F	

Unidentified

Description: A parcel of land that can not be identified. Vested, Dedicated and severed land may be included in this category as well as Old System lots for which no lot/DP identification can be found.

GeometryType:esriGeometryPolygon **HasM:**False **HasZ:**False

Attribute Name	Data Type	Allow Nulls	Constraints
Reference	Char	T	DmC_SurveyLineType
UnidentifiedLabel	Char	T	
ControllingAuthorityOID	Integer (0)	F	
PlanOID	Integer (0)	T	
PlanNumber	Integer (0)	T	
PlanLabel	Char (40)	T	
ITSTitleStatus	SmallInteger (0)	F	DmC_ITSTitleStatus
ITSLotID	Integer (0)	T	
StratumLevel	SmallInteger (0)	F	DmC_StratumLevel
HasStratum	SmallInteger (0)	T	DmC_Boolean
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

UnidentifiedAuthorityRef

Description: An AuthorityReference relating to parcels that are part of the Unidentified feature class.

Attribute Name	Data Type	Allow Nulls	Constraints
UnidentifiedOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

UpgradeArea

Description: An area depicting the extent of a spatial upgrade adjustment.

GeometryType:esriGeometryPolygon **HasM:**False **HasZ:**False

Attribute Name	Data Type	Allow Nulls	Constraints
EpochOID	Integer (0)	T	
FileReference	Char	T	
PositionalUncertainty	Double (7,3)	T	
LocalUncertainty	Double (7,3)	T	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	
ReferenceDataCustodian	Char(255)		
ReferenceDataDate	Date/Time		
ReferenceDataSource	SmallInteger (0)		DmC_DataSource
ReferenceDataAdjustmentMethod	SmallInteger (0)		DmC_Upgrade
Meanshift	Double (7,3)		
StandardDeviationShift	Double (7,3)		
Job_id	Integer (0)		

WaterFeature

Description: A contained area of water, eg: lake, river, creek, etc., which forms a Cadastral boundary and is not described by lot and DP.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
ControllingAuthorityOID	Integer (0)	F	
PlanOID	Integer (0)	T	
PlanNumber	Integer (0)	T	
PlanLabel	Char (40)	T	
ITSTitleStatus	SmallInteger (0)	F	DmC_ITSTitleStatus
ITSLotID	Integer (0)	T	
StratumLevel	SmallInteger (0)	F	DmC_StratumLevel
HasStratum	SmallInteger (0)	T	DmC_Boolean
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	
SectionNumber	Char (3)	F	
LotNumber	Char(6)	T	

WaterFeatureAuthorityRef

Description: An AuthorityReference relating to WaterFeatures.

Attribute Name	Data Type	Allow Nulls	Constraints
WaterFeatureOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

WaterFeatureCorridor

Description: A polygon thats extent represents a corridor of water.

GeometryType:esriGeometryPolygon		HasM:False	HasZ:False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
WaterFeatureNameOID	Integer (0)	T	
WaterFeatureNameLabel	Char	T	
ClassSubtype	Integer (0)	F	Subtype values for this class
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

Watermark			
Description: A spatial linear feature representing the extent of the definition of a boundary of a water feature or the delineation between water features of a different type or status.			
GeometryType:esriGeometryPolyline		**HasM:**False	**HasZ:**False
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
ClassSubtype	Integer (0)	F	Subtype values for this class
Description	Char	T	
CadID	Integer (0)	F	
CreateDate	Date/Time	F	
ModifiedDate	Date/Time	T	

WaterMarkAuthorityRef			
Description: An AuthorityReference relating to the boundary redefinition of a Watermark.			
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
WaterMarkOID	Integer (0)	F	
AuthorityReferenceOID	Integer (0)	F	
CreateDate	Date/Time	F	

WatermarkPlan			
Description: Defines a plan which defines or contains reference to the location to the tidal limit of a stream.			
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
WatermarkOID	Integer (0)	F	
PlanOID	Integer (0)	F	
CreateDate	Date/Time (9)	F	

WatermarkReference			
Description: Defines the relationship between a watermark definition and a file holding details in relation to that definition.			
Attribute Name	**Data Type**	**Allow Nulls**	**Constraints**
WatermarkOID	Integer	F	
FileReferenceOID	Integer	F	
CreateDate	Date/Time (9)	F	

Attributes

ABSCode

Description: The LGA code allocated by the Australian Bureau of Statistics

AccountOID

Description: Object ID of the related Crown Account

AccountPartOID

Description: Object ID of the related Crown account part

AHDClass

Description: Is a fuction of the Class of a survey, the conformity of the new survey data with an existing network coordinate set and the precision of any transformation process required to convert results from one datum to another

ArcDirection
Description: The direction from which the arc is measured.

ArcDistance
Description: The distance of the arc

AreaCADID
Description : The CADID of its parent Administrative layer class object

Area_M2
Description: The total area of the physical object in square metres.

AreaName
Description: The name of the administrative area

AreaSource
Description: The type of document/method used to derive the area of the physical object. Eg: Diagram, GIS, Estimate.

AreaType
Description: A domain containing the Administrative Area type e.g. Suburb

AreaUnits
Description: the units the area is defined or displayed in. METRIC (for sq m, ha) or IMPERIAL (for acres, roods and perches)

AuthorityActionType
Description: The type of gazettal action, act or file reference e.g. Acquistion

AuthorityReferenceOID
Description: Holds a reference to the gazettal notice which defined or modified the account part. Usually only applies when an account is modified while still current

AuthorityReferenceType
Description: The type of Authority the source reference e.g. Act (Federal or State)

Bearing
Description: The direction of the line in relation to a specific reference datum, measured clockwise and expressed in angular units. (the reference datum could be grid North, true north, etc).

CadID
Description: Key and unique identifier of a record for an instance of a feature.

CadLineOID
Description: The Object ID of the related CadLine spatial feature

CadLineType
Description: The attribute for domain types for fabric and non fabric cadlines

CadPointCADID
Description: The CADID of the cadpoint

CadPointOID

Description: The Object ID of the related CadPoint spatial feature

CentralAngle

Description: The CentralAngle describes the span of the CircularArc. The CentralAngle is the angular measure between the FromAngle and the ToAngle

ChordDistance

Description: The distance of the chord

ClassSubtype

Description: The subtype field of Lot,WaterFeature,Road and Unidentified

CombinedScaleFactor

Description: Scale factor is the ratio of an incremental distance measured on the ellipsoid to the distance on a grid, whereas combined scale factor is the ratio of the former distance to the distance on the ground

CommenceDate

Description: Date the relationship between the physical object and the Account began

ConstructLineNumber

Description: The line number of the planline construction

ConstructTraverseNumber

Description: The traverse number of the planline construction

ConstructLineType

Description: The types of lines within a plan at Construction stage

LINE CODE	DESCRIPTION
AM	Azimuth Magnetic Line
AZ	Azimuth Line
LL	Survey Lead Line
BL	Boundary Line
IL	Internal Line
EL	Easement Line
RL	Residual Line
AL	Administrative Line
PL	Proposed Line
RC	Road Centre Line
SL	Split Line
CB	Creek Boundary Line
CR	Creek Reverse Line
CK	Creek Line
CL	Crown Line
CP	Crown Point Line
XL	Extra Line
DE	Delete Line
FL	False Line

LINE CODE	DESCRIPTION
DL	Excluded Polygon Derived Line
RLX	Residual Extra Line
ILR	Extended Internal Line
CKR	Extended Creek Line

ControllingAuthorityOID

Description: The identifier relating to the authority responsible for the area of land ControllingAuthority:-

AUTHORITYID	AUTHORITYNAME	AUTHORITYSOURCE
1	UNKNOWN	Cadastral theme dataset
2	FREEHOLD	Cadastral theme dataset
3	CROWN	Cadastral theme dataset
4	LOCAL GOVERNMENT AUTHORITY	Cadastral theme dataset
7	SHARED CROWN / COUNCIL	Cadastral theme dataset
12	NSW GOVERNMENT	Cadastral theme dataset
13	AUSTRALIAN GOVERNMENT	Cadastral theme dataset

CoordinateOID

Description: The Object ID of the related Coordinate

CouncilName

Description: The name of the Council e.g. The Council of the Municipality of Hunters Hill

CouncilWidth

Description: Field describing the width of a road segment for which the local government council is the controlling authority

CouncilWidthUnits

Description: Field describing the units in which the council road width is defined

CountyName

Description: Name of County

CountyOID

Description: The Object ID of the related County spatial feature

CreateDate

Description: The date the object was created

CrownAccountID

Description: The Crown external identifier from the CLID system. This is used as the search ID for an account and for reserves may not be unique. In these cases the lreg_no is required to define a specific account.

CrownAccountType

Description: Attribute to further classify the type of account into its theme (or display) sub-category. Not used for all account sub-types

CrownGazettalID

Description: The unique identifier from CLID of the crown gazettal record

CrownKeyID

Description: Defines the unique identifier of the account part records equivalent record from the CLID database. This will be the ID from the lreg_part or the crown_estate_load table as defined by the CrownKeyType attribute.

CrownKeyType

Description: Defines a pointer type back to the CLID administration database. LREG_PART defines a pointer to the CLID lreg_part table (all records should eventually carry this value); CROWN_ESTATE_LOAD indicates a pointer back to the original collected Crown attributes (account parts will only carry this type of entry until such time that their attributes can be properly linked to an account part).

CrownLandLineOID

Description: Defines the relationship between a Crown land account part and a spatial line feature

CrownLandPointOID

Description: Object ID of the related Crown land point spatial feature

CrownLandPolygonOID

Description: Defines the relationship bewteen a Crown land account part and a spatial polygon feature

CrownLandStatusType

Description: A broad classification of the general status of the land. Defined by various domains dependant on the feature sub-type.

CrownLinkID

Description: The CLID database ID for the account / structure relationship from the lreg_structure table

CrownLregNo

Description: The unique CLID identifier (lreg number) for the Crown account

CrownStructureOID

Description: Object ID of the related Crown Structure

CrownStructureType

Description: A broad classification of the general status of the structures. Defined by various domains dependant on the feature sub-type.

DefinitionType

Description: Defines the type of account part. LOT for lots or part lots; DESCRIBED for described pieces of land (no lot/dp identifier).

Description

Description: Provides a text description

Dimensions

Description: A description of the size of a physical object. Eg: 3m wide X 5m long.

DisposalStatus

Description: The status of a crown land, line or point feature that is being disposed of

Distance

Description: The recorded distance for a surveyed line

DistanceType

Description: The units of measements used on the plan of survey

DistrictName

Description: The name of the District

DivisionName

Description: The name of the Federal Electoral Division

EasementOID

Description: The Object ID of the related Easement spatial feature

EasementType

Description: The type of major community easement e.g. electricity

EasementWidth

Description: The width of an easement

EndAuthorityReferenceOID

Description: A reference to the gazette notice which notifies the termination of the Crown account

EpochOID

Description: The Object ID of the related Epoch

EpochType

Description: The type of epoch See Domains OriginalSource and Upgrade

FeatureClassSubtype

Description: The subtype number of the FeatureClass subtype e.g. Lot subtype number = 1

FEDOID

Description: The Object ID of the related Federal Electoral Division spatial feature

FileReference

Description: The reference name of the file that contains the information for which PositionalUncertainy and Local Uncertainty values were derived

FileReferenceOID

Description: The Object ID of the file relating to the watermark definition

FromCadPointOID

Description: The direction of the planline in relation to the OBJECTID of the cadpoint

GazettalOID

Description: The Object ID of the related Gazettal

GDAClass

Description: Is a function of the precision of a survey network, reflecting the precision of observations as well as suitablity of network design,survey methods,instruments and reduction techniques used in that survey.

HasStratum

Description: A nomination that the plan so described contains reference and definition to the stratum value of land in the plan

Height

Description: Australian Height Datum. The origin height for all reduced levels as fixed by the Surveyor-General.

IsControlled

Description: An attribute that describes whether a point feature has be connected to survey control or not

IsCurrent

Description: An attribute that describes whether it is current or superceded

IsSurveyed

Description: A flag to indicate if the plan is compiled or surveyed.

ITSLotID

Description: The unique identifier held in ITS

ITSTitleStatus

Description: a flag that indicates the status of the parcel in relation to the Integrated Titling System. This status is based on the CreateDate (when it was entered into the Cadastral Maintenance Database)

Job_id

Description: The unique identifier of the job that performed the upgrade

LALCOID

Description: The Object ID of the related Aboriginal Land Council spatial feature

LandDistrictOID

Description: The Object ID of the related Land Distict spatial feature

LandsOfficeOID

Description: The Object ID of the related Lands Office spatial feature

Latitude

Description: The southern or northern geographic position of a point

LGAName

Description: An attribute for the Local Government Area Name (see Local Government Act 1993 No 30 Chapter 9)

LGAOID

Description: The Object ID of the related LGA spatial feature

LocalCouncilName

Description: The name of the Local Aboriginal Land Council

LocalUncertainty

Description: The average measure, in metres at the 95% confidence level, of the relative uncertainty of the coordinates, or height, of a point(s), with respect to adjacent points in the defined frame

Longitude

Description: The eastern or westerly geographic postion of a point

LotNumber

Description: An alpha or number allocated to a parcel of land created on a plan of subdivison or title e.g Lot 10 DP12345

LotNumber (Accountpart)

Description: An alpha or number allocated to a parcel of land created on a plan of subdivision, title or in the Crown Lands Database as an artificial identifier e.g Lot 10 DP12345

LotOID

Description: The Object ID of the related Lot spatial feature

LotRelationship

Description: Describes the amount of the lot relating to the account part: WHOLE or PART.

LTOCode

Description: A unique ID of the LGA from NSW Land Registry Services

MarkNumber

Description: The number of the mark in SCIMS

MarkType

Description: The type of the mark in SCIMS e.g TS

MeanShift

Description: Mean length (in metres) of the displacement between the previous and upgraded positions of Cadastral boundary points

MiscReserveOID

Description: The Object ID of the related Miscellaneous Reserve spatial feature

ModifiedDate

Description: The date the object was modified

MSDOID

Description: The Object ID of the related Mines Subsidence District spatial feature

NameSuffix

Description: The SUFFIX component of a road name as defined by AS4212-1994 Street Addressing Standard. eg. 'West' in Prince Street West

NameSuffixCode

Description: The abbreviated SUFFIX component of a road name as defined by AS4212-1994 Street Addressing Standard. eg. 'W' in Prince St W

NameType

Description: The TYPE component of a road name, as defined by AS4212-1994 Street Addressing Standard. eg. 'Street' in Prince Street West.

NameTypeCode

Description: The abbreviated TYPE component of a road name, as defined by AS4212-1994 Street Addressing Standard. eg. 'Street' in Prince Street West.

NoStructures

Description: The actual number of physical objects. Used when an area is not a useful descriptor of the object and rent etc is charged by number of objects rather than area occupied eg: Mooring Poles.

NotationID

Description: The notation id from the Cadastral Records Directory database

Notes

Description: Description of the physical object when it is believed more detail is required.

NPOID

Description: The Object ID of the related National Park spatial feature

OfficeName

Description: The name of the Lands Office

OfficeCode

Description: The unique ID of the Lands Office object

Offset

Description: A point located at the extension of a line and marking the direction of the line.

Orientation

Description: The datum line specially determined from established survey monuments on public record and its bearing or direction, adopted by a surveyor as the base line for a survey. Alternatively the bearing used may be taken from astronomical observations.

ParishDPNo

Description: The deposited plan number of the parish.

ParishName

Description: The name of the parish.

ParishOID

Description: The Object ID of the related Parish spatial feature.

PlanAnnotation

Description: The plan number required for annotation e.g Plannumber or Small Number/Suffix

PlanExtentStatus

Description: A flag describing the state of the plan definition i.e. complete, partial or unknown. As these records were populated automatically by analysis with the Integrated Titling System (ITS), in some cases the state will be unknown.

PlanLabel

Description: The plan number and type e.g DP123,SP123,102-3050.

PlanLineType

Description: The method used to determine the dimension of the plan line e.g. surveyed or deduced.

PlanLotArea

Description: The area of the lot as defined by the plan of subdivision.

PlanLotAreaUnits

Description: The area units of the lot as defined by the plan of subdivision.

PlanNo

Description: Defines the deposited or strata plan number of the parcel underlying the account part. Used for referential integrity with the fabric.

PlanNumber

Description: The number of a plan, unique for a particular type of plan.

PlanNumber (AccountPart)

Description: The number of a plan, unique for a particular type of plan or an artificial plannumber in the Crown Lands Database.

PlanNumberSuffix

Description: The suffix number of a crown plan.

PlanOID

Description: The Object ID of the related Plan spatial feature.

PlanPurpose

Description: The type of plan e.g. Deposited Plan. The purpose for which the plan was created e.g. subdivision, survey, redefinition.

PlanType

Description: Defines the plan type of the parcel underlying the account part: D deposited plan; S strata plan. Used for referential integrity with the fabric.

PositionalUncertainty

Description: The uncertainty of the coordinates or height of a point, in metres at the 95% confidence level, with respect to the defined reference frame.

PostCode

Description: The postcodes defined by Australia Post.

PrecinctName

Description: The name of the Domestic WaterFront precinct.

Radius

Description: A line segment with one endpoint on the circle and the other endpoint being the centre.

RailwayNameLabel

Description: The name of the road corridor.

RailwayNameOID

Description: The OBJECTID of the RailwayNmae in the Railway Names table.

RailwayOID

Description: The Object ID of the related Railway spatial feature.

Reference

Description: A descriptor of the parcel e.g. Book and Number.

ReferenceDataCustodian

Description: Name of the custodian organisation for the reference cadastre (used for realignment)

ReferenceDataDate

Description: Date of the supplied reference cadastre. Either:

- Current date of reference set (where known)

- Date of supply (where currency date not known)

ReferenceDataAdjustmentMethod

Description: Domain of upgrade methods DmC_Upgrade.

ReferenceDataSource

Description: Domain of source types DmC_DataSource.

ReferenceDate

Description: The date of the gazettal notice,act or file.

ReferenceFolio

Description: The page of the gazettal notice, act of legislation or file reference. If prefixed by CG it is a Commonwealth Gazette e.g. CG 876-877.

ReferenceName

Description: A relevant reference name of the gazette,act of legislation or government file.

RegionalCouncilName

Description: The name of the Regional Aboriginal Land Council.

RegisteredPlanID

Description: The unique ID from ITS of plan.

RegistrationDate

Description: The date the plan was registered at NSW Land Registry Services.

ReserveCode

Description: The unique ID of the reserve.

ReserveName

Description: The name of the National Park or Wildlife Service Reserve.

ReserveType

Description: The type of reserve e.g. National Park.

ReverseOrientation

Description: Reverses the parameterization of the curve ('from' point becomes 'to' point, first segment becomes last segment, etc).

RLPDOID

Description: The Object ID of the related Rural Land Protection District spatial feature.

RoadCorridorOID

Description: The Object ID of the related RoadCorridor spatial feature.

RoadCorridorType

Description: The type of road corridor (Road or Pathway).

RoadNameLabel

Description: The full name of a road cenetreline i.e. Name, type and suffix.

RoadNameOID

Description: The OBJECTID from the class RoadName.

RoadOID

Description: The Object ID of the related Road spatial feature.

RoadType

Description: The attribute that describes whether the road is a road corridor or an intersection of road corridors.

RoadWidth

Description: Field describing the defined width of a road segment.

RoadWidthUnits

Description: Field describing the units in which the road width is defined.

ScimsInterfaceOID

Description: The Object ID of the related ScimsInterface.

SectionAnnotation

Description: The attribute used for the annotation layer e.g A.

SectionNumber

Description: Original subdivisions in a private town where large areas or estates were subdivided and the plan was divided into sections, so that lot numbers could be repeated in each section though still retaining unique parcel identities.

SEDOID

Description: The Object ID of the related State Electoral District spatial feature.

SmallNumber

Description: The small number of the plan e.g. 1234-1603 R The number 1603 is the small number of miscellaneous plan 1234.

SmallNumberSuffix

Description: A code that describes the format of the plan e.g. 1234-1603 R. The code R means that the plan is a Roll Plan.

SourceCadID

Description: The CADID from the source feature class.

StandardDeviationShift

Description: Standard deviation of the boundary point displacements.

StartAuthorityReferenceOID

Description: A reference to the gazettal notice which defines or notifies the creation of the Crown account.

State

Description: The states of Australia that may be included in the Cadastre.

StateForestName

Description: The name of the State Forest.

StateForestOID

Description: The Object ID of the related StateForest spatial feature.

StratumLevel

Description: A parcel of land restricted in height and/or depth by reference to Australian Height Datum (AHD) or other datum approved by the Surveyor-General – see also 1.5.10. Currently only ground level parcels.

Structure

Description: The name of a physical object. eg: Jetty, Ramp, Building.

StructureLineOID

Description: Object ID of the related Crown Structure line spatial feature.

StructureOID

Description: Object Id of the related Crown structure.

StructurePointOID

Description: Object ID of the related Crown Structure point spatial feature.

StructurePolygonOID

Description: Object ID of the related Crown Structure polygon spatial feature.

StructureType

Description: A code to classify the structure into distinct types for display and the application of integrity rules. The structure type must match the Crown Structure Type of any linked spatial structure feature.

SuburbName

Description: The name of the suburb or locality.

SuburbOID

Description: The Object ID of the related Suburb or locality spatial feature.

SurveyDate

Description: Date shown on the face of a survey plan as the date at which a survey was completed by the surveyor.

SurveyLineOID

Description: The Object ID of the related CadLine spatial feature.

SurveyLineType

Description: The domain for type of surveyline e.g. Traverse.

SurveyMarkOID

Description: The OBJECTID of the Survey Mark in SCIMS.

TerminateDate

Description: The date the physical object was removed.

ToCadPointOID

Description: The direction of the planline in relation to the OBJECTID of the cadpoint.

UnidentifiedOID

Description: The Object ID of the related Unidentified spatial feature.

UnidentifiedLabel

Description: The attribute used for the annotation layer e.g UNIDENTIFIED.

VGCode

Description: A unique ID of the LGA from Valuer Generals.

WaterFeatureNameLabel

Description: The type of Waterfeature e.g. Creek.

WaterFeatureNameOID

Description: The OBJECTID of the Waterfeature name in the WaterfeatureNames table.

WaterFeatureOID

Description: The Object ID of the related WaterFeature spatial feature.

WatermarkOID

Description: The object ID of the watermark referred to on a plan.

WBCode

Description: A unique ID of the LGA from Water Board (Sydney Water).

Subtype Descriptions - By Feature Class

AboriginalLandClaim - Subtypes	
ClaimBoundary: ClassSubtype value: **1**	*Description: The sum of all other segments for the claim*
UnderInvestigation: ClassSubtype value: **2**	*Description: An area under investigation*
Granted: ClassSubtype value: **3**	*Description: A claim area that has been granted*
Refused: ClassSubtype value: **4**	*Description: A claim area that has been refused*
Finalised: ClassSubtype value: **5**	*Description: A claim area being finalised*

AdministrativeAreas - Subtypes
County: ClassSubtype value: **1**
FederalElectoralDivision: ClassSubtype value: **2**
LocalAboriginalLandCouncil: ClassSubtype value: **3**
LandDistrict: ClassSubtype value: **4**
LandsOffice: ClassSubtype value: **5**
LocalGovernmentArea: ClassSubtype value: **6**
MinesSubsidenceDistrict: ClassSubtype value: **7**
MiscellaneousReserves: ClassSubtype value: **8**
NPWSReserve: ClassSubtype value: **9**
Parish: ClassSubtype value: **10**
LivestockHealthPestAuthorityDistrict: ClassSubtype value: **11**
StateElectoralDistrict: ClassSubtype value: **12**
Suburb: ClassSubtype value: **14**
CatchmentManagementArea: ClassSubtype value: **15**
AboriginalLandClaim: ClassSubtype value: **16**
DomesticWaterFrontPrecinct: ClassSubtype value: **17**

AuthorityReference - Subtypes	
Gazettal: ClassSubtype value: 1 **Associated Domain:**DmC_GazettalAuthority	*Description: The Gazette that related to the update*
Act: ClassSubtype value: 2 **Associated Domain:**DmC_ActType	*Description: The Act that related to the update*
File: ClassSubtype value: 3 **Associated Domain:**DmC_FileReferenceType	*Description: The government file to reference*
Dealing: ClassSubtype value: 4 **Associated Domain:**None	*Description: A dealing created in the Integrated Titling System*

CadLine - Subtypes	
Fabric: ClassSubtype value: **1** **Associated Domain:**DmC_CadLineFabricType	*Description: The line segments that all fabric features in the Cadastral Geodatabase are derived from.*
NonFabric: ClassSubtype value: **3** **Associated Domain:**DmC_CadlineNonFabricType	*Description: The line segments that non fabric polygon features in the Cadastral Geodatabase are derived from.*
NonFabric: ClassSubtype value: **3** **Associated Domain:**DmC_CadlineNonFabricType	*Description: The line segments that non fabric polygon features in the Cadastral Geodatabase are derived from.*

CadPoint - Subtypes

Boundary: ClassSubtype value: **1**	*Description: A point that defines the end of a Cadastral fabric bounday line*
ReferenceMark: ClassSubtype value: **2**	*Description: A point that defines a survey mark of a durable nature placed or situated near and connected by measurement to a corner, angle or tangent point of a survey.*
SurveyControl: ClassSubtype value: **3**	*Description: A point that defines the position of a State Survey mark*
Traverse: ClassSubtype value: **4**	*Description: A series of lines between survey stations established by angular and linear measurements starting and closing onto control or old traverse survey stations.*
Easement: ClassSubtype value: **5**	*Description: A point that defines the end point of an easement*

CrownAccount - Subtypes

Dedication: ClassSubtype value: **6** **Associated Domain:** DmC_CrownAccountReserveType	*Description:*
Lease: ClassSubtype value: **2** **Associated Domain:** DmC_CrownAccountLeaseType	*Description: Defines a Crown leasehold tenure which confers on the lessee or tenant exclusive possession of land for a definite period of time, or for successive definite periods of time until determined by either party at the end of any one such period*
Reserve: ClassSubtype value: **1** **Associated Domain:** DmC_CrownAccountReserveType	*Description: Crown land reserved from sale, lease or licence or for future public requirements or other public purpose. This includes dedications, proclamations, and commons.*
Other: ClassSubtype value: **5** **Associated Domain**: DmC_CrownAccountOtherType	*Description: Defines a piece of Crown land not actively managed but usually a remnant of a defunct Crown account. This sub-type does not define all vacant Crown land for the state.*
Licence: ClassSubtype value: **3** **Associated Domain:** DmC_CrownAccountLicenceType	*Description: Defines a licence over Crown land. A licence is a personal right granted by the Minister, which, at law, gives permission to occupy and use Crown land for a specified purpose.*
EnclosurePermit: ClassSubtype value: **4**	*Description: Defines a type of tenure, which allows landholder to enclose wholly or in part any Crown road or watercourse by which their land is traversed or bounded*
RegionalCrownReserve: ClassSubtype value: **8** **Associated Domain:** DmC_CrownAccountReserveType **Proclamation:** ClassSubtype value: **7**	*Description:*

CrownLandLine - Subtypes

CrownParcel: ClassSubtype value: **1** **Associated Domain:**DmC_CrownLandStatus	*Description: A land parcel under the control of the Crown which is not a Crown Waterway or Crown Road.*
CrownWaterway: ClassSubtype value: **2**	*Description: Defines the bed of a waterway which is controlled by the Crown.*

CrownLandPoint - Subtypes

CrownParcel: ClassSubtype value: **1** *Associated Domain:DmC_CrownLandStatus.*	*Description: A land parcel under the control of the Crown which is not a Crown Waterway or Crown Road*

CrownLandPolygon - Subtypes	
CrownParcel: ClassSubtype value: **1** **Associated Domain:**DmC_CrownLandStatus	*Description: A land parcel under the control of the Crown which is not a Crown Waterway or Crown Road.*
CrownWaterway: ClassSubtype value: **2**	*Description: Defines the bed of a waterway which is controlled by the Crown*
CrownRoad: ClassSubtype value: **3** **Associated Domain:** DmC_CrownRoadStatusType	*Description: A road under the care and control of the Minister Administering the Crown Lands Act 1993 and including boundary and reserved roads. They remain Crown Land. This subtype also includes roads where control is shared between the Crown and a local government council.*

Easement - Subtypes	
Primary: ClassSubtype value: **1** Associated Domain:DmC_PrimaryEasement	*Description: Those easements required to maintain major services to the community where plans are registered in the Integrated Titling System.*
Secondary: ClassSubtype value: **2** **Associated Domain:**DmC_SecondaryEasement	*Description: All other easements that have been deemed as a user requirement.*

Epoch - Subtypes	
OriginalSource: ClassSubtype value: **1** **Associated Domain:**DmC_OriginalSource	*Description: The source of the original cadastral data. Pre GIS cadastral data was captured as hardcopy at various mapping scales*
Update: ClassSubtype value: **2** **Associated Domain:**DmC_UpdateType	*Description: The update that has been adjusted to fit to the cadastral. If the update was a plan connected to control it will also have an epoch type of Controlled Plan*
Upgrade: ClassSubtype value: **3** **Associated Domain:**DmC_Upgrade	*Description: The cadastral was upgraded using a set of available resources e.g. controlled plan, ortho rectified image etc*
ControlledPlan: ClassSubtype value: **4**	*Description: A plan that contains references and connections to State Survey marks*
FieldCheck: ClassSubtype value: **5**	*Description: An epoch of corner coordinates that have been established in the field.*
CoordinatedPlan: ClassSubtype value: **6**	*Description: A plan the boundaries of which have been defined by coordinates e.g. GPS, Photogrammetric*

Lot - Subtypes	
StandardLot: ClassSubtype value: **1**	*Description: A parcel of land created on a plan of subdivison or title e.g Lot 10 DP12345 It may be an allotment or portion number in a Crown Town or Parish plan and does not give any indication to title system or tenure. That is, the lot may be under Real Property or Old System, may be freehold or leased belonging to Church, government department, council etc.*
StandardPartLot: ClassSubtype value: **2**	*Description: Where the original area of the lot, allotment or portion has been reduced by partial subdivision or resumption This warns the user that the boundaries and area for such lots have changed from those on the plan which created them. This does not apply to parcels still administered by Land NSW, as they will have their boundaries and areas changed to reflect their actual shape and area at the time of sale or conversion to freehold.*
Strata: ClassSubtype value: **3**	*Description: A lot defined in a plan lodged under any strata scheme legislation.*
Stratum: ClassSubtype value: **4**	*Description: A parcel of land restricted in height and/or depth by reference to Australian Height Datum (AHD) or other datum approved by the Surveyor-General – see also 1.5.10. Currently only ground level parcels.*

NPWSReserve - Subtypes	
NationalPark: ClassSubtype value: **1**	*Description: A relatively large area protected for its unspoiled landscapes and native plants and animals. National parks are set aside for public education and recreation, and usually offer visitor facilities.*
NatureReserve: ClassSubtype value: **2**	*Description: An area of special scientific interest. Nature reserves are mainly established to conserve their native plant and animal communities. Few have visitor facilities.*
HistoricSite: ClassSubtype value: **3**	*Description: A site of national cultural importance, including buildings, objects, monuments and landscapes. Historic sites are generally open to visitors.*
RegionalPark: ClassSubtype value: **4**	*Description: A park situated near a large population centre, offering open space and recreational and cultural opportunities for urban residents. The environments in regional parks have often been largely altered since European occupation.*
KarstConservationReserve: ClassSubtype value: **5**	*Description: Concerning caves, these are for the management, protection and recreational use of land comprised substantially of soluble rocks such as limestone or dolomite and characterised by landforms produced by solution, abrasion or collapse or by underground drainage (or both).*
AboriginalArea: ClassSubtype value: **6**	*Description: Land reserved under the National Parks and Wildlife Act 1974 for the purpose of preserving, protecting and preventing damage to Aboriginal objects or Aboriginal places. These are places that have significance for Aboriginal people, or contain objects of Aboriginal culture.*
StateConservationArea: ClassSubtype value: **7**	*Description: A park, often containing important natural environments, which has been set aside mainly for outdoor recreation.*

Plan - Subtypes	
DepositedPlan: ClassSubtype value: **1** **Associated Domain:** DmC_PlanPurposeDepositedPlan	*Description: A plan of land deposited in the Office of the Registrar General, which was not attached to a dealing or deed nor lodged for the purposes of a strata scheme. the Registrar General may, for convenience, number or re-number other plans as deposited plans or prepare deposited plans of his own motion.*
StrataPlan: ClassSubtype value: **2** **Associated Domain:**DmC_PlanPurposeStrataPlan	*Description: A plan of subdivision of a building into separate parts, usually with common ownership of the land containing the building eg: as for a block of home units.*
CommunityPlan: ClassSubtype value: **3** **Associated Domain:**DmC_ PlanPurposeCommunityPlan	*Description: These are plans of community division that include lots and common property. Neighbourhood plans further divide community plans.*
CrownPlan: ClassSubtype value: 4 **Associated Domain:**DmC_PlanPurposeCrownPlan	*Description: A plan of survey/compilation depicting Crown Land.*

Road - Subtypes	
Public: ClassSubtype value: **1** **Associated Domain:**DmC_RoadType	*Description: A road dedicated for use by the public. Such roads are controlled and managed by the Local Authority or the Roads and Traffic Authority. Also referred to as a dedicated road, gazetted road or street.*
Pathway: ClassSubtype value: **2**	*Description: Land acquired for use as a footway.*

RoadCorridor - Subtypes

Undefined: ClassSubtype value: **0**	*Description: A roadway that's subtype couldnot be detremined in the migration process.*
PublicRoadInUse: ClassSubtype value: **1** **Associated Domain:**DmC_ RoadCorridorPublicRoadType	*Description: A roadway that is in use.*
PrivateRoad: ClassSubtype value: **2** **Associated Domain:**DmC_ RoadCorridorPrivateRoadType	*Description: A road over which only certain individuals or a select class of the public have rights of passage.*
ProposedRoad: ClassSubtype value: **3** **Associated Domain:**DmC_ RoadCorridorProposedRoadType	*Description:*

Unidentified - Subtypes

Surveyed: ClassSubtype value: **1**	*Description: An parcel of land that has been surveyed but hold no lot identifier e.g. Miscellaneous Plan.*
UnSurveyed: ClassSubtype value: **2**	*Description: A parcel of land that has no lot identifier and is unsurveyed.*
100FtWideReserve: ClassSubtype value: **3**	*Description: A 'reservation' in the form of a Grant of 100 feet from high water mark is, in fact, an 'exception' from the Grant of a strip of land of that width on the landward side of mean high water mark as existing at the date of the grant - McGrath V Williams (1912) 12 SR 477.*
ClosedRoad: ClassSubtype value: **4**	*Description: A public road closed by legal processes. The land involved is usually disposed of to the owners of adjoining properties.*
Crossing: ClassSubtype value: **5**	*Description: A parcel of land which is the intersection of one or more of the following corridor features: a road and waterway a road and railway a waterway and a railway an overpass or underpass (eg: freeway over road) Crossings are not Cadastral features. They were included in the original Cadastral theme data to provide continuity of "corridor features". Crossings do not necessarily infer a man made structure exists.*
AustralianCapitalTerritory: ClassSubtype value: **6**	*Description: Land adjacent to or surrounded by NSW that is Australian Capital Territory Land*

WaterFeature - Subtypes

Undefined: ClassSubtype value: **1**	*Description: Where there is doubt whether the water is tidal or non-tidal eg: sections of watercourse where tidal limit is not defined and coastal swamps or lagoons which may be intermittently tidal.*
Tidal: ClassSubtype value: **2**	*Description: Where the cadastral line defining the water features extent is assumed to be mean high water mark, valid until the upstream "limit of tidal influence" is reached.*
NonTidal: ClassSubtype value: **3**	*Description: Upstream of the limit of tidal influence or generally fresh water not subject to tidal movement.*
Ocean: ClassSubtype value: **4**	*Description: The area of NSW that is within the Pacific Ocean.*

WaterFeatureCorridor - Subtypes

Undefined: ClassSubtype value: **1**	*Description: Where there is doubt whether the water is tidal or non-tidal eg: sections of watercourse where tidal limit is not defined and coastal swamps or lagoons which may be intermittently tidal.*
Tidal: ClassSubtype value: **2**	*Description: Where the cadastral line defining the water features extent is assumed to be mean high water mark, valid until the upstream "limit of tidal influence" is reached.*
NonTidal: ClassSubtype value: **3**	*Description: Upstream of the limit of tidal influence or generally fresh water not subject to tidal movement.*
Ocean: ClassSubtype value: **4**	*Description:The area of NSW that is within the Pacific Ocean.*

Watermark - Subtypes	
HighWaterMark: ClassSubtype value: **1**	*Description: The line defining the high tides at ordinary spring and neap tides.*
LowWaterMark: ClassSubtype value: **2**	*Description: The line defining the low tides at ordinary spring and neap tides.*
LimitofTidalInfluence: ClassSubtype value: **3**	*Description: The point along a watercourse at which the flow of water is not affected by the rise or fall of the tide.*
BayClosingLine: ClassSubtype value: **4**	*Description: The line defining where a bay, harbour etc closes.*

Domain Descriptions

DmC_State	
Domain:	
1: Australian Capital Territory	*Description: The territory Australian Capital Territory*
2: New South Wales	*Description: The state of New South Wales*
3: Victoria	*Description: The state of Victoria*
4: Queensland	*Description: The state of Queensland*
5: South Australia	*Description: The state of South Australia*

DmC_CrownStructureLicenceType	
Domain:	
0: Undefined	
1: Access structure	*Description: A structure for the purpose of access and egress to another structure or parcel of land*
2: Access to water	*Description:*
3: Building/Shed	*Description: A roofed and walled structure built for permanent use for shelter or storage*
4: Berthing Area	*Description: An area where a ship lies when at anchor or at a wharf or jetty*
5: Channel or canal	*Description: The bed where a natural stream of water runs or an artificial waterway for navigation or for draining or irrigating land*
6: Commercial building(s)	*Description: A building used primarily for business or commercial use*
7: Community building(s)	*Description: A building primarily used for community purposes*
8: Dam	*Description: A body of water confined by a barrier*
9: Dugout	*Description: A shelter dug in the ground or hillside*
10: Jetty	*Description: A structure extended into a sea, lake, or river used as a landing wharf*
11: Land/Reclamation	
12: Monument or tower	*Description: A building or structure typically higher than its diameter and high relative to its surroundings that may stand apart, or be attached to a larger structure. A building or stone edifice erected in remembrance of a person or event or as an identifying mark.*
13: Pipe or power line	*Description: A line of pipe or cable used for the purposes of transporting liquids or electricity*
14: Piles	*Description: A group of long timber, steel, or reinforced concrete columns driven into the bed of a water body used for the purposes of a mooring*
15: Platform	*Description: A usually raised horizontal flat surface*
16: Pump or bowser	*Description: A device that raises, transfers fluids by suction or pressure and for the delivery of fuel.*
17: Ramp	*Description: A sloping way, floor, walk, or roadway leading from one level to another. A slope for launching boats.*

DmC_CrownStructureLicenceType	
18: Residence	*Description: A building used as a home*
19: Reservoir	*Description: An artificial lake where water is collected and kept in quantity for use*
20: Swimming pool / enclosure	*Description: A pool or enclosure within a water body made for the purposes of swimming*
21: Sport and recreation	*Description: A structure used for the purposes of sport or other recreational activity*
22: General structure	*Description: A structure used for any general purpose not incorporated by another more specific classification*
23: Seawall	*Description: A wall or embankment to protect the shore from erosion or to act as a breakwater*
24: Unlicenced Seawall	*Description: A wall or embankment to protect the shore from erosion or to act as a breakwater that does not have a licence issued from the Dept of Lands.*
25: Slipway	*Description: An inclined usually concrete surface for a ship being built or repaired*
26: Trigonometrical Structure	*Description: A structure used for the purposes of identifying controlled survey marks*
27: Utility structure	*Description: A structure constructed and used for the provision of a service by a public utility*
28: Wharf/Marina/Dock	*Description: A structure built along the shore of navigable waters so that ships may lie alongside to receive and discharge cargo and passengers and or provide secure moorings, supply, repair and other facilities*
29: Usage	
30: Unknown

DmC_LotPlanReferenceType	
Domain:	
0: Undefined	
1: IdentifierPlan	*Description: The plan defining the Lot/DP identifier*

DmC_LotPlanReferenceType	
2: TitleDiagram	*Description: The title diagram referred to in the LAND description of the title e.g. Crown plan or Deposited Plan (Torrens). This will only be recorded where different from identifier plan*
3: Survey Plan	*Description: A plan containing survey information but not used for title*
4: Reference Plan	*Description: A plan or diagram relevant to a parcel for a purpose other than survey or title definition. e.g. Reserve Plan*

DmC_CrownRoadStatusType	
Domain:	
0: Undefined	
1: Crown Road	*Description: A road for which the Crown is the roads authority as defined by the Roads Act 1993*
2: Shared Crown / Council Road	*Description: A road for which control is shared between the Crown and Local Government council*

DmC_PlanPurposeCommunityPlan	
Domain:	
0: Undefined	
28: Community Plan	*Description: Subdivides a parcel into a community scheme of association property and development lots*
29: Precinct Plan	*Description: Subdivides a parcel into a precinct scheme of association property and development lots*
30: Neighbourhood Plan	*Description: Subdivides a parcel into a neighbourhood scheme of association property and development lots*
31: Community Replacement Sheet	*Description: Replacement to an existing sheet in a community scheme*
32: Community Additional Sheet	*Description: An addition sheet to a community plan.*
33: Community Boundary Adjustment Plan	*Description: Shows alteration of boundaries between association property and development lots*
34: Community Subdivision Plan	*Description: Subdivision of a community development lot into 2 or more new lots*
35: Precinct Subdivision Plan	*Description: Subdivision of a precinct lot into 2 or more new lots*
36: Neighbourhood Subdivision Plan	*Description: Subdivision of a neighbourhood lot into 2 or more new lots*
38: Precinct Consolidation Plan	*Description: Combines two or more precinct lots into one parcel*
37: Community Consolidation Plan	*Description: Combines two or more community development lots into one parcel*
39: Neighbourhood Consolidation Plan	*Description: Combines two or more neighbourhood lots into one parcel*

DmC_Boolean	
Domain:

DmC_CrownAccountLeaseType	
Domain:	
0: Undefined	
1: Leased Crown land	*Description: Defines a Crown leasehold tenure which confers on the lessee or tenant exclusive possession of land for a definite period of time, or for successive definite periods of time until determined by either party at the end of any one such period*
2: Incomplete Purchase	*Description: Defines a Crown account, usually a converted lease, contracted to be sold but for which the full sale price has not yet been paid*
3:Section 34A Lease	
4:Ministerial Corporation Lease	

DmC_CadlineNonFabricType	
Domain:	
0: Undefined	
1: Administrative Layer	*Description: A line segment of an administrative area that does not coincide with a fabric feature*
2: Measured Crown	*Description: A line segment of a crown feature that has a plan of survey or measurements*
3: Easement On Boundary	*Description: A line segment of an easement that coincides with a fabric feature*
4: Easement Off Boundary	*Description: A line segment of an easement that does not coincide with a fabric feature*

DmC_Upgrade	
Domain:	
0: Undefined	
1: Original Cogo Entry - Fit to Plan	*Description: The cadastral update has not been adjusted, fabric moved to plan*
2: Scaled COGO - Fit to Plan	*Description: The cadastral update has been PO adjusted and scaled*
3: UnScaled COGO - Fit to Plan	*Description: The cadastral data has been PO adjusted but not scaled*
4: COGO,SurveyControl,ImageQA	*Description: The update has been inputted using bearing and distances from the plan and connected to control. As a final positional check an ortho-rectified image has been used.*
5: COGO,SurveyControl	*Description: The update has been inputted using bearing and distances from the plan and connected to control.*
6: COGO,Topo Image/Linework QA	*Description: The update has been inputted using bearing and distances from the plan but no control was available to connect to. As a final positional check an ortho-rectified image/Topographic linework has been used.*
7: COGO	*Description: The update has been inputted using bearing and distances from the plan but no control was available to connect to.*
8: Realigned to Sydney Water Data	*Description: The method is based on the idea of choosing the adjustable parameters in a model such that the sum of the squared difference between the calculated values and the observed values is a minimum.*
9: Least Square Adjustment	*Description: The method is based on the idea of choosing the adjustable parameters in a model such that the sum of the squared difference between the calculated values and the observed values is a minimum.*
10: Positional upgrade has been performed by capturing all relevant survey control, bearing and distance information from plans and using a rigorous adjustment methodology.	

DmC_Upgrade

DmC_Upgrade
11: Positional upgrade has been performed with the assistance of control provided by selected survey controlled plans and using a rigorous adjustment methodology.
12: Positional upgrade has been performed with the assistance of control provided by a selection of survey controlled plans, air photo imagery, satellite imagery, GPS occupation and using a rigorous adjustment methodology.
13: Realigned to External Data Source

DmC_CrownAccountOtherType	
Domain:	
0: Undefined	
1: Access	*Description: Land set aside for access and egress to another parcel of land*
2: Aquaduct	*Description: A conduit for carrying a large quantity of flowing water*
3: 100ft Reservation	*Description: A 'reservation' in the form of a Grant of 100 feet from high water mark is, in fact, an 'exception' from the Grant of a strip of land of that width on the landward side of mean high water mark as existing at the date of the grant - McGrath V Williams (1912) 12 SR 477.*
4: Dam	*Description: A body of water confined by a barrier*
5: Driftway	*Description: A lane or road along which cattle are driven*
6: Drainage	*Description: Land used for the purpose of carrying away surface water*
7: Intertidal Zone	*Description: Land lying between mean high water mark and mean low water mark*
8: Mining Tenement	*Description: Residence used in connection with mining*
9: Pipeline	*Description: A line of pipe with pumps, valves, and control devices for conveying liquids or gases*
10: Plantation	*Description: A large group of plants, usually trees, under cultivation*
11: Police Purposes	*Description: Land set aside for use by the NSW Police Service*
12: Water Race	*Description: A narrow channel through which flows a strong or rapid current of water*
13: Railway Reserve	*Description: Land set aside for use as or in connection with a railway*

DmC_CrownAccountOtherType

Domain:	
14: Severed Land	*Description: A small segment of land separated from its parent parcel by survey. Usually associated with a road re-alignment*
15: Tramway	*Description: A railway like structure used for transportation*
16: Wharf	*Description: A structure built along the shore of navigable waters so that ships may lie alongside to receive and discharge cargo and passengers*
17: Windbreak	*Description: A growth of trees or shrubs serving to break the force of wind*

DmC_WaterFeatureType

Domain:	
0: Undefined	*Description:*
1: Tidal	*Description: Where the cadastral line defining the water features extent is assumed to be mean high water mark, valid until the upstream "limit of tidal influence" is reached.*
2: Non-Tidal	*Description: Upstream of the limit of tidal influence or generally fresh water not subject to tidal movement.*
3: Unspecified	*Description: Where there is doubt whether the water is tidal or non-tidal eg: sections of watercourse where tidal limit is not defined and coastal swamps or lagoons which may be intermittently tidal*
4: Ocean	*Description: The area of NSW that is within the Pacific Ocean*

DmC_FileReferenceType

Domain:	
0: Undefined	
1: Transaction File	*Description: A file type within the Department. Used at Bathusrt for all internal transactions*
2: Holding File	*Description: A file type within the Department. Used at Lands Offices for the Crown Estate*

DmC_RoadCorridorProposedRoadType

Domain:	
0: Undefined	
1: Public Road	*Description: A public place provided for the use of the public for traffic movement, and which has been declared, or proclaimed, notified or dedicated.*
2: Motorway	*Description: A defined class of road for which certain activities or uses are restricted or prohibited by legislative provision. (See also expressway and freeway)*
3: Freeway	*Description: A divided highway for through traffic with no access for traffic between interchanges and with grade separation at all intersections. (See also expressway and motorway)*
4: Tollway	*Description: A freeway, for the use of which a toll has to be paid.*
5: Private Road	*Description: A road not gazetted as a public road maintained by the road authority*

DmC_PlanSource

Domain:	
0: Undefined	

DmC_PlanSource	
1: Private	*Description: The plan was initiated by a private concern e.g. a company*
